Learning aims	**A** Understand strategies and training requirements associated with in-game skills **B** Explore best practices, skills, techniques and tactics of high performing teams **C** Carry out performance analysis in a game to recommend improvements for an individual or team.
Assignment title	Esports International Festival
Assessor	
Issue date	
Hand in deadline	

Vocational scenario or context	A major festival called *Esports International* is taking place at a large convention centre in a major well known city. In addition to the main event of an esports tournament, there will be a range of other activities taking place at the festival. The organisers are looking for esports enthusiasts to be involved in various ways throughout the week-long event. To be considered for being involved, you should complete the following three tasks that demonstrate your all-round knowledge and skills in esports to the festival organisers.

Task 1	The festival will feature practical hands-on workshops for people who are new to esports. To be considered for running one of these workshops, you must present your knowledge of in-game skills and strategies in contrasting types and genres of games. For each of your selected games, you should compare and evaluate the different game practices focussing on: 1. Specific in-game skills that are used in the games 2. Specific strategies that are deployed within the games 3. Training requirements associated with the games You should make your presentation as creative as possible and could include actual game footage with commentary that discusses the various skills, techniques and strategies being used in each game. Your presentation will be delivered to the event organisers so they can check that you have the required knowledge and skills for the role.
Checklist of evidence required	• Presentation in an appropriate format (vlog, filmed presentation, report)

Criteria covered by this task:	
Unit/criteria reference	To achieve the criteria, you must show that you are able to:
3/A.D1	Evaluate practices used in different in-game skills, strategies and training across the different genres of games.
3/A.M1	Compare different in-game skills, strategies and training across different types of games.
3/A.P1	Explain the different in-game skills, strategies and training requirements used in esports.
Task 2	At the festival, there will be a seminar called 'The Best in the World'. The organisers are inviting speakers to give 5-10-minute presentations about high performing esports teams with international reputations, highlighting their ingredients to success. To be considered for speaking at the seminar, you should prepare a presentation that compares two high performing global esports teams and evaluates: 1. Specific team practices 2. Skills, techniques and tactics used by the team 3. How the team is managed You should evaluate the critical elements of high performance within one of your chosen teams. Your presentation will be delivered to the event organisers so that they can see your knowledge within this area. You should make your presentation as creative as possible by incorporating actual game footage, interviews with players etc.
Checklist of evidence required	• Presentation in an appropriate format (vlog, filmed presentation, report)
Criteria covered by this task:	
Unit/Criteria reference	To achieve the criteria you must show that you are able to:
3/B.D2	Evaluate the critical elements of high performance in a high performing team.
3/B.M2	Compare different use of management, skills, techniques and tactics used by high performing teams.
3/B.P2	Outline the general management, practices, skills, techniques and tactics used across high performing teams.
Task 3	The festival organisers are keen to provide opportunities for new teams to develop and improve their performance ahead of the competition and would like to assign a mentor to each team. For the organisers to see your potential for being a mentor, you should prepare a short presentation that explains why performance analysis is used in gaming and its benefits. You should refer to the different methods of performance analysis associated with different games. So that the organisers can see how you analyse performance, you should carry out a performance analysis of **either** a team **or** individual performance in an esports game. You should assess the strengths and weaknesses of the performance making recommendations and setting targets for future improvement. The analysis could be presented as a written report or a filmed presentation incorporating game footage.
Checklist of evidence	• Presentation in an appropriate format (vlog, filmed presentation, report etc.) covering why performance analysis is used in gaming

required	• Performance analysis of an actual esports game that contains a plan for future improvements for either a team or individual
Criteria covered by this task:	
Unit/Criteria reference	To achieve the criteria you must show that you are able to:
3/C.D3	Evaluate the impact of the performance analysis on the competitive game, making recommendations on improvements for an individual or team performance
3/C.M3	Analyse the performance of a competitive game and create a detailed plan for future improvements
3/C.P3	Explain why performance analysis is used in gaming
3/C.P4	Carry out a performance analysis on an esports game
